

# Exploring the Impact of Human Psychology and Counseling in Enhancing User Experience and Mental Well-being within the ICT Industry through Web Technology

**Name : P.K. Imashi Sndeeepika Bandara**  
**Reg No : C 38874**  
**Supervisor: Ms. Romesha Dayananda**

# Introduction

## **Background:**

- Digital platforms influence daily life.
- Importance of integrating psychology into User Experience (UX).

## **Problem Statement:**

Psychological detachment and emotional fatigue in digital platform users.

## **Objectives:**

Investigate psychology and counseling's impact on web technology.

# Research Objectives

1. Explore psychological theories applied in web technologies.
2. Integrate counseling methods into ICT tools.
3. Identify psychological drawbacks of existing ICT products.
4. Develop a human-centered design framework.
5. Evaluate ICT tools that enhance mental health and UX.

# Methodology

- Research Design:**

Qualitative approach using thematic analysis.

- Participants:**

10 interviewers who are university 4th year seniors, internes and ICT lecturers

- Data Collection:**

Individual interviews.

# Key Findings

## Friendly Designs:

Using soft colors, simple layouts, and calm visuals helps users feel relaxed.

## Adding Counseling Ideas:

Designs that understand users' feelings and give helpful feedback.

## Problems with Current Tools:

Many tools make people feel stressed or tired because they are hard to use.

# Conclusion

## **Findings:**

- Incorporating psychology and counseling can enhance UX and reduce digital stress.

## **Implications:**

- Practical guidelines for UX designers and ICT developers.
- Framework for creating mental health-friendly digital environments.

# Future Directions

- Include diverse participants to understand different user needs.
- Test the framework in real ICT environments.
- Study deeper psychological concepts like emotional intelligence.
- Collaborate between psychologists and developers for better designs.
- Create policies to support mental health in digital tools.

# Thank You

Appreciate the opportunity to present my research. Please feel free to ask any questions you may have.
